

PURE GARLIC

PURE GARLIC

DID YOU KNOW?

That quite rightly, Garlic is the most widely used supplement natural or otherwise for horses because of its year round health benefits.

Although 'fashionable' to feed it in granule form, the slightly less convenient, but less expensive Pure Garlic Powder enters the internal system through the blood more quickly and efficiently. Remember, the finer the cut; the quicker the absorption!

Known as one of the 'Plague herbs,' it is a great preventative and helps guard against coughs, viral infection and worm infestation. Any horse with respiratory worries should also be fed pure garlic as it is both an expectorant and antibiotic aid.

Rich in sulphur means it has a blood cleansing action and when excreted through the skin the sulphur helps to deter biting flies – both these attributes makes it perfect for the sweet itch sufferer as well as horses generally bothered by flies.

Pure Garlic is perfectly safe to feed to all horses, at a rate of 15-30gm on a daily basis, with the exception in our opinion, of a nursing mare, for whom the sulphur may taint the milk and possibly effect the foal's delicate digestive system.

It is however, also a great Digestive aid for older animals as it supports the development of natural bacterial flora, So vital to a good digestive system. It also kills harmful pathogens. Feed 100% pure garlic, an ultimate health additive - very few horses should be without!!

On sale here; Garlic powder, grains (finely cut) and granules -1kg, 3kg, 12.5kg & 25kg.
